

Computerized Systems Implementation – Project Management with Quality Focus

Acting as an external PMO, our goal is to oversee and manage the implementation of new Computerized Systems with a strong emphasis on Quality aspects. We ensure that all project activities align with regulatory requirements and industry best practices, facilitating a smooth and efficient implementation process while maintaining focus on quality assurance and validation

Project Planning and Execution

We develop comprehensive project plans that outline key milestones, deliverables, timelines, and resource allocations. Our team oversees the execution of project activities, ensuring adherence to quality standards, regulatory requirements, and project timelines. We proactively identify and address any potential issues or risks that may arise during the implementation process to minimize disruptions and ensure project success.

Quality Oversight

We provide rigorous Quality Assurance oversight throughout the implementation process, ensuring that all project activities adhere to established Quality standards and regulatory requirements. Our team conducts regular reviews and audits of project documentation, deliverables, and processes to verify compliance and identify areas for improvement. We work closely with project stakeholders to address any quality-related issues promptly and effectively, maintaining a high level of Quality throughout the implementation lifecycle.

CSV Management

We oversee the Validation activities associated with the implementation of Computerized Systems, ensuring that requirements are clearly defined, documented, and executed according to regulatory guidelines. Our team collaborate closely with internal teams, including IT, vendors, and regulatory authorities, to ensure that all validation activities are completed successfully and in accordance with regulatory expectations.
