

Nitrosamines – Project Management

Our service is dedicated to overseeing and coordinating Nitrosamines ICH M7 adaption projects for pharmaceutical companies. We ensure meticulous planning, execution, and monitoring of every project aspect to guarantee compliance with regulatory standards and timely completion

Project Planning and Scheduling

Detailed planning of project activities, milestones, and timelines to align with regulatory requirements and client expectations.

Development of comprehensive project schedules to track progress and ensure adherence to deadlines for each phase of the adaptation process.

Stakeholder Coordination

Facilitation of effective communication and collaboration among project stakeholders, including regulatory affairs, quality assurance, R&D, and manufacturing teams.

Regular meetings and updates to keep stakeholders informed about project progress, key milestones, and any issues or challenges encountered.

Risk Management and Issue Resolution

Identification and assessment of potential risks and issues that may impact project timelines or compliance objectives.

Implementation of proactive risk mitigation strategies and timely resolution of issues to minimize disruptions and maintain project momentum.
