

Master Data Management (Computerized Systems) – Workshop and Trainings

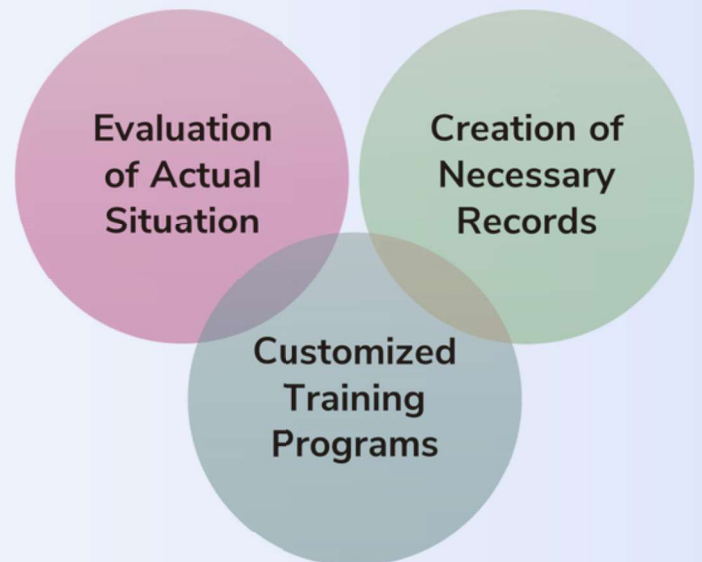

Zamann Pharma Support offers customized workshops and trainings sessions, considering the specific needs of pharmaceutical companies. These sessions aim to enhance the understanding and implementation of Master Data Management practices in compliance with regulatory standards such as FDA, EMA, and GAMP5

Workshop Development and Delivery

Creation of customized workshops to address the specific needs and challenges of each client, ensuring relevance and practicality.

These workshops feature interactive elements such as group discussions, case studies, and hands-on exercises to enhance engagement and knowledge retention.

Our experienced facilitators guide participants through the workshop, providing insights, answering questions, and fostering productive discussions.

Training Program Implementation

Training programs cover a wide range of topics related to master data management, including data governance principles, data lifecycle management, data standards, and compliance requirements.

Training sessions can be conducted on-site at the client's facility, virtually through webinars or online platforms, or in a blended format combining both in-person and remote learning.

We develop customized training materials, including presentations, manuals, and reference guides, tailored to the client's specific systems, processes, and regulatory environment.
