

Computerized Systems Validation – Workshop and Trainings

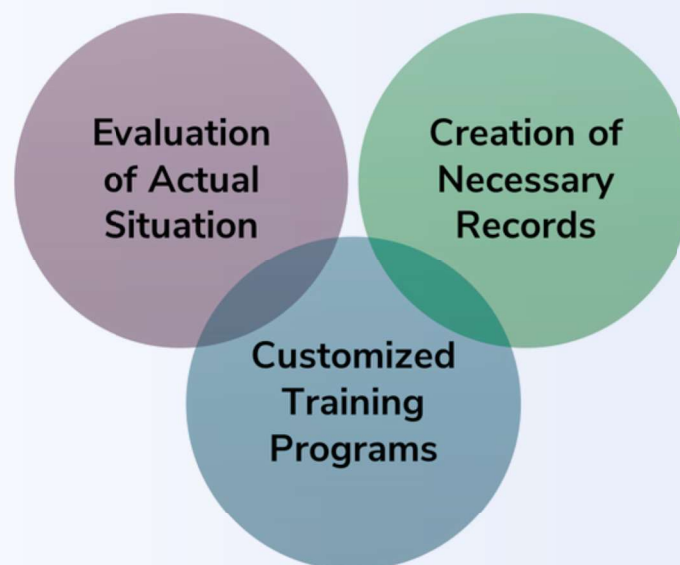

Zamann Pharma Support offers specialized workshops and training programs, designed to enhance understanding and proficiency in Computerized Systems Validation principles and practices, empowering pharmaceutical industry professionals to effectively implement and manage CSV processes

Customized Workshops

We conduct customized workshops tailored to the specific needs and requirements of pharmaceutical companies. These workshops cover topics such as CSV fundamentals, regulatory requirements, risk assessment methodologies, validation planning and execution, documentation practices, and audit preparation. Through interactive sessions, case studies, and practical exercises, participants gain comprehensive knowledge and practical skills necessary for successful CSV implementation.

Training Programs

We offer comprehensive training programs designed to equip pharmaceutical industry professionals with the knowledge and skills required for effective computerized systems validation. Our training programs cover a wide range of topics, including CSV regulations and guidelines, validation lifecycle phases, validation documentation, risk management, change control, and data integrity. Participants receive in-depth instruction from industry experts, supplemented by practical examples, case studies, and hands-on exercises to reinforce learning and ensure practical application in real-world scenarios.
