

Project Management with Quality Focus – Strategy Creation

Zamann Pharma Support offers comprehensive consultancy services to create all necessary background documentation and educate clients on executing project management without compromising Quality. We develop robust strategies, procedures, and documentation frameworks to mitigate quality risks and ensure compliance with regulatory standards

Documentation Framework Development

We collaborate with clients to establish a comprehensive documentation framework, including project plans, SOPs, templates, and forms, tailored to their specific needs and regulatory requirements. Our team ensures that all documentation is aligned with industry best practices and regulatory standards, providing clear guidelines for project execution.

Change Control Focus

Zamann assists clients in implementing robust Change Control processes, including procedures for assessing, documenting, and managing changes throughout the project lifecycle.

We provide guidance to project teams on Change management principles and practices, emphasizing the importance of thorough change documentation and impact assessment to mitigate quality risks.

Risk Management Strategies and Education

Our consultancy service helps clients develop risk management strategies to identify, assess, and mitigate quality risks associated with project activities. We educate project teams on risk management principles, tools, and techniques, empowering them to proactively identify and address potential quality issues throughout the project lifecycle.
