

Project Management with Quality Focus – GAP Assessment

We offer specialized consultancy dedicated to evaluating clients' implemented processes related to Project Management. Our service focuses on identifying potential GAPS in the way clients execute project management activities, with particular attention to risks to Quality aspects. Through meticulous assessment and analysis, we provide valuable insights to enhance project management practices and ensure alignment with quality standards

Process Evaluation and Documentation Review

We conduct a comprehensive evaluation of the client's existing project management processes, procedures, and documentation.

Our team assesses the alignment of these processes with quality standards and regulatory requirements, identifying any discrepancies or deficiencies that may pose risks to quality aspects.

GAP Identification and Risk Assessment

We identify potential GAPS and areas of improvement in the client's project management practices, focusing on aspects that may impact quality outcomes. We prioritize these GAPS based on their potential impact on quality and regulatory compliance, conducting risk assessments to determine the likelihood and severity of associated risks.

Recommendations and Action Plan Development

Based on the findings from the GAP assessment, we provide actionable recommendations and develop a strategic action plan to address identified GAPS.

Our team collaborates closely with clients to prioritize corrective actions and implement process improvements, ensuring effective risk mitigation and enhancement of project management practices.

We provide ongoing support and guidance throughout the implementation phase, assisting clients in executing the action plan and monitoring progress.
