

Knowledge Management – Strategy Definition

Zamann Pharma Support assists pharmaceutical companies in developing robust strategies to effectively manage and leverage their organizational knowledge assets. We work closely with clients to define comprehensive approaches that facilitate knowledge creation, capture, sharing, and utilization across the organization, ensuring optimal knowledge management practices

Strategy Development

Based on the current situation, we develop customized knowledge management strategies that align with the organization's goals, objectives, and regulatory requirements.

Our strategies encompass methodologies for knowledge creation, capture, storage, retrieval, sharing, and dissemination, leveraging technologies and best practices to optimize knowledge utilization and value realization.

Knowledge Needs Assessment

We conduct a thorough assessment to identify the knowledge needs and requirements of the organization across various functions, departments, and projects.

Governance Framework Establishment

We assist in establishing governance frameworks and structures to govern the entire knowledge management lifecycle, including policies, processes, roles, and responsibilities.

This involves defining clear guidelines for knowledge ownership, access rights, version control, quality assurance, and compliance management, ensuring accountability and integrity throughout the knowledge management process.
