

# Risk Management – Strategic Consultancy

Expert guidance and strategic consultancy for Risk Management, assisting pharmaceutical companies in establishing a robust landscape for integrating Risk Management aspects into their Quality activities. We provide services to create necessary SOPs or evaluation of existing processes to enhance effectiveness and compliance

## Risk Assessment Framework Development

We collaborate with clients to develop a comprehensive Risk Assessment framework customized to their specific needs and regulatory requirements. This involves defining risk assessment methodologies, criteria for risk evaluation, and risk mitigation strategies to guide decision-making processes.

## SOP Development and Integration

Zamann Pharma Support assists in the development and integration of SOPs for Risk Management across various quality activities. This includes defining clear procedures for risk identification, assessment, prioritization, and mitigation, ensuring alignment with regulatory standards and industry best practices.

## Process Evaluation and Improvement

We conduct thorough evaluations of the client's existing Risk Management processes, identifying areas for improvement and optimization. This involves analyzing the effectiveness of risk identification methods, risk assessment criteria, and risk mitigation strategies to enhance overall risk management practices. Through GAP analysis and continuous improvement initiatives, we help organizations strengthen their Risk Management capabilities.
