

# Risk Management – Strategy Definition

Our service offers comprehensive support in establishing robust Risk Management strategies aligned with international regulations. We provide guidance and technical expertise, including the development of Policies, SOPs, and executional templates to ensure compliance and enhance risk management capabilities.

## Risk Assessment Workshops

We conduct interactive workshops to facilitate the identification, evaluation, and prioritization of risks across various business processes and activities. Our experienced facilitators guide participants through structured risk assessment methodologies, such as FMEA (Failure Mode and Effects Analysis) or HACCP (Hazard Analysis and Critical Control Points), enabling them to identify potential risks and determine appropriate mitigation strategies.

## Risk Management Plan Development

We collaborate with clients to develop comprehensive risk management plans tailored to their specific organizational needs and regulatory requirements. These plans outline the strategies, methodologies, roles, and responsibilities for managing risks throughout the product lifecycle.

## SOP and Template Creation

We assist clients in developing SOPs and templates for consistent and standardized risk management practices across the organization. These documents provide clear guidelines and instructions for conducting risk assessments, documenting risk management activities, and reporting findings. By developing customized SOPs and templates, we ensure compliance with regulatory requirements and promote efficient risk management processes.
