

# Batch Record Review – Strategic Consultancy

We offer strategic consultancy for Batch Record Review, assisting pharmaceutical companies in establishing an effective framework for the compliant execution of the activity. We provide guidance on creating essential Standard Operating Procedures (SOPs) or evaluate existing processes, to identify areas for enhancement

## Process Evaluation

Our team conducts thorough evaluations of existing Batch Record review processes. Through detailed analysis, we identify strengths, weaknesses, and areas for improvement, considering factors like data integrity, completeness, accuracy, and regulatory compliance. Recommendations are then provided to enhance process efficiency and effectiveness.

## SOP Development

Zamann Pharma Support collaborates closely with clients to craft comprehensive and customized Standard Operating Procedures (SOPs), describing clear procedures, responsibilities, review criteria, documentation requirements, and escalation processes, ensuring consistency and alignment with regulatory requirements.

## Training and Implementation Support

We offer training sessions and implementation support to the necessary teams involved in batch record review. These sessions cover essential topics such as review protocols, data interpretation, error identification, and regulatory compliance. Ongoing support is provided to address challenges and ensure successful implementation of optimized review processes.
