

Knowledge Management – Focused Trainings

Our service covers a range of specific trainings related to Quality topics, such as; non-conformance management, Change Control, SOPs, Market Complaints, Training Program, and Batch Release, with focus on ensuring that these trainings are designed to enhance the client's know-how level by incorporating best references such as FDA and EMA guidelines

Training Needs Assessment

We conduct a thorough assessment of the client's training needs, identifying gaps in knowledge and areas for improvement.

Our team collaborates closely with the client to determine specific topics and training objectives based on organizational requirements and regulatory expectations.

Customized Training Design

Zamann designs customized training modules tailored to the identified topics, incorporating relevant regulatory references and industry best practices.

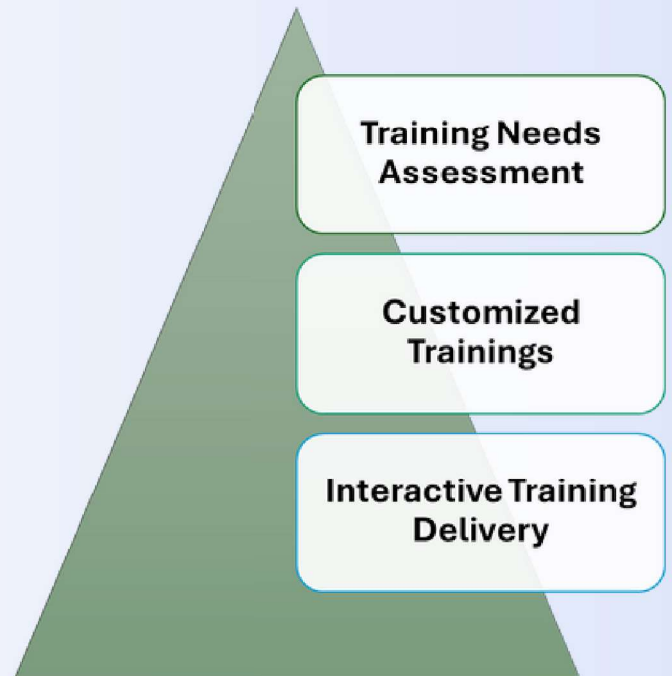

Training materials are developed to address the specific needs and learning preferences of the client, ensuring maximum relevance and engagement.

Interactive Training Delivery

We deliver interactive training sessions that engage participants through a variety of learning methods, including presentations, case studies, group discussions, and practical exercises.

Our trainers provide expert guidance and facilitate discussions to encourage knowledge sharing and application of concepts in real-world scenarios.

Participants receive hands-on experience and practical insights that empower them to apply learned concepts effectively in their roles within the organization.
