

Periodical Internal Audits – CAPA Plan Management

We offer specialized consultancy dedicated to executing CAPA (Corrective and Preventive Action) Management for actions generated post Internal Audits. We ensure thorough implementation of designated tasks to enhance compliance and improve Quality Management Systems. Our services focus on overseeing the entire CAPA process, from initiation to closure, to drive continuous improvement and regulatory adherence.

CAPA Plan Assessment

We conduct a comprehensive review of CAPA plans generated from Internal Audit findings, assessing the adequacy and effectiveness of proposed corrective and preventive actions.

Our team evaluates the feasibility, clarity, and alignment of CAPA tasks with identified issues and regulatory requirements, ensuring comprehensive action plans.

Implementation Oversight

Zamann provides oversight throughout the implementation of CAPA tasks, monitoring progress, timelines, and resource allocation.

We collaborate closely with client stakeholders to address any challenges or barriers to implementation, facilitating timely and effective execution of CAPA actions.

Verification and Closure

After completion of CAPA tasks, we verify its effectiveness, through follow-up assessments and performance metrics.

Our team ensures that all actions have been successfully implemented and have achieved the desired outcomes before closing out the CAPA process.
