

Quality Leadership Development – Competency Development Program

Zamann Pharma Support offers customized support to enhance the capabilities of Quality Leaders in the pharmaceutical industry. Leveraging the expertise of seasoned professionals with over 15 years of experience in Quality Leadership Development, our program starts from a comprehensive assessment of leaders' knowledge levels, going through personalized development plans, and providing ongoing support and mentoring to assist leaders in overcoming routine challenges

Competency Assessment

The competency assessment process involves a thorough review of the Quality Leader's knowledge, skills, and abilities in various areas such as Quality Management Systems, regulatory compliance, risk management, and leadership. Our experienced consultants use a combination of methods including interviews, competency evaluations, and review of past performance to gather data. By identifying gaps between current capabilities and desired competencies, we gain insights into areas that require development and improvement.

Development Plan Creation

Based on the findings from the competency assessment, we work closely with the Quality Leader to create a customized development plan. It will outline clear, measurable objectives and milestones for improving competencies and achieving professional growth. It includes a mix of training programs, workshops, seminars, and on-the-job learning experiences customized to address identified GAPs and enhance leadership skills.

Ongoing Support and Mentoring

Our senior consultants provide continuous support and mentoring to Quality Leaders throughout the implementation of their development plans.

Through regular meetings, coaching sessions, and feedback mechanisms, our experienced consultants offer guidance, advice, and practical solutions to help leaders overcome challenges, refine their skills, and achieve their full potential.
