

# Labware LIMS – Creation of Training Material

Zamann Pharma Support provide consultancy for Creation of Training Material, designing a complete suite of customized educational resources to empower employees in effectively using Labware LIMS. The service encompassed the development of SOPs, user manuals, practical assessments, video tutorials, and interactive guides, ensuring that employees at all levels could work within the system confidently. By combining technical expertise with a user-centric approach, Zamann ensured that the training materials met both operational needs and regulatory compliance

## Needs Assessment and Curriculum Design

Collaborated with stakeholders to identify knowledge gaps and training needs among employees. Designed a structured training curriculum tailored to each user group, covering essential system functionalities, advanced features, and troubleshooting practices.

## Development of Training Materials

Created comprehensive training materials from scratch, including step-by-step SOPs, interactive user manuals, video tutorials for visual learning, and practical tests to assess knowledge retention. Each material was aligned with company processes, regulatory requirements, and best practices.

## Customization and Quality Assurance

Tailored training materials to reflect the company's specific Labware LIMS configurations and workflows. Conducted rigorous quality checks to ensure accuracy, clarity, and usability. Provided revisions based on stakeholder feedback to enhance the effectiveness of the materials.
