

Labware LIMS – End User Trainings

Zamann Pharma Support offers customized consultancy to identify specific needs of the client's team and deliver focused training sessions. These trainings were designed to bridge knowledge GAPS, enhance technical skills, and empower users to maximize the system's capabilities. By aligning training content with the team's daily operations and challenges, the consultancy ensured practical and impactful knowledge transfer that improved both system utilization and team confidence

Assessment and Training Customization

Conducted a detailed assessment of the team's roles, responsibilities, and current knowledge of Labware LIMS functionalities. Designed a customized training program that targeted real-world challenges and addressed specific gaps in understanding, ensuring relevance and practicality.

Focused System Functionality Trainings

Delivered strategic, hands-on training sessions covering essential Labware LIMS functionalities, such as sample management, workflow configuration, and data analysis. These sessions included live demonstrations, interactive exercises, and Q&A discussions, ensuring the team developed confidence and competency in using the system.

Post-Training Support and Knowledge Reinforcement

Provided follow-up support to reinforce learning through additional resources, one-on-one coaching, and system simulations. Addressed specific questions or challenges faced by the team after the training sessions, ensuring the training impact was sustained over time.
